Official Publication of the Competition Motorsports Association

Here we go – Kicking off the second half of our COMMA season! We have had many adjustments this summer. There are new faces in many positions including some brand new (for us) equipment. The variety in the classes is great and points standings are full of surprises.

One of our priorities this year is fire safety. We will establish a standard required time for emergency exit that all will have to demonstrate.

Our HST brings variety to the track.

If you know someone with a sports car, invite them to come out and learn how to safely drive fast.

To kick off our discussion on fire safety Don Tessier volunteered to be our first trial run at the Drivers Meeting. There is a video on the FB page. He ejected through the window after killing power, mock pulling fire extinguisher, unbuckling belts and window net then rolling to the ground in 13.5 seconds. Way to set the standard, Don.

There is always close racing in the Legends. How many cars are in this picture?

Several of the Legend drivers also performed well as “emergency egress” participants.

It does sound like some sort of threatened waterfowl but this is serious business. I believe our fastest exit from one of these behemoths was Tom Lay at 8.2 seconds!

Speaking of serious business three of our Porsche competitors wanted to do timed exits as a group as they came off the track after their heat race. All did well but Nate came with his race face on and did a blistering 6.8 seconds! The intensity he had could have ignited the cockpit. Way to demonstrate focus, Nate. Once a competitor--

These fine fellows ran hard and were rewarded with fine crystal and a bottle of water. Only Bryan figured out how to combine them properly.
