

Technical Inspection Form for COMMA

Please note:

- 1. Before an inspection will be initiated, the car owner or driver presenting the car must show proof the car has been registered with the COMMA registrar for the date/event entered.
2. All race vehicles must be inspected and approved by a COMMA Tech Inspector PRIOR to being moved to the start grid for any on-track event entered.
3. The tech inspection decal affixed to a car remains valid for the remaining period of the current COMMA season unless the car, subsequent to the initial annual inspection, is significantly damaged or modified, which requires a reinspection.
4. All COMMA rookies must attend driver orientation before driving on track
5. The inspection checklist serves as a guide concerning minimum standards for race cars running on-track. Neither COMMA nor any of its representatives certifies by this inspection that any car is safe for on-track operations. The car owner and/or driver hereby freely accepts the property and personal risks inherent in auto racing/lapping. The owner and/or driver of the car attests s/he is unaware of any safety or operational conditions that would render the car unsuitable for on-track usage.

Signature of owner/ driver: _____ date _____

Member name (please print) _____ COMMA car class: _____

Car year / make/ model _____ color(s) _____ car # _____
